

AACS1483 Web Design and Development

Assignment

Year 2022/2023, Semester 1

Programme : DFT Y1S1 G5							
Tutorial Class : Group 5							
Website Title : Kicoco Mobile Phone Station							
No.	Student Name	Student ID	Module In Charge	Signature	Part 1 (30%)	Part 2 (70%)	Total (100%)
1	CHAN JIAN BIN	22PMD08539	Home, Others(include purchase part), About Us, Contact Us)				
2	CHUNG LI YI	22PMD07946	Everything Linked in Laptop.html				
3	NG KAI WEN	22PMD07849	Everything linked in Apple.html				
4	LAI YAN XI	22PMD07916	Everything linked in tablet.html				
5	WONG YUNQING	22PMD07929	Everything linked in smartwearable.html				
Lecturer: Loo Sze Phei				Practical Tutor : Mr Wong Kim Ben			
Date of Submission: 25th SEPTEMBER 2022							

Assignment: Use web development tool, HTML, Cascading Style Sheets (CSS) and JavaScript to create a website for conducting the business online and fulfilling the customer needs.

Assessment Rubrics – Assignment Part 1 (30 marks)

Proposal -Criteria	Marks	Excellent	Good	Average	Poor	Score														
CLO 3: Develop websites to cater for different types of products or services in the business world. (A2, PLO7)																				
Planning ● Description of the organization ● Website objectives ● Potential users ● Information the users need ● Proposed deliverable	15	Excellently define all the required information. (12 –15)	Correctly define most of the required information. (9 – 11)	Correctly define some of the information. The rest are either incorrect or missing. (6 – 8)	Most of the information is missing, incomplete or incorrect. (0 – 5)															
Web Analysis ● Functions or modules	15	Excellently define all the required information. (12 –15)	Correctly define most of the required information. (9– 11)	Correctly define some of the information. The rest are either incorrect or missing. (6 – 8)	Most of the information is missing, incomplete or incorrect. (0 – 5)	<table border="1" style="float: right; margin-right: 10px;"> <tr> <th>Name</th> <th>Mark</th> </tr> <tr> <td>1. CHAN JIAN BIN</td> <td></td> </tr> <tr> <td>2. CHUNG LI YI</td> <td></td> </tr> <tr> <td>3. NG KAI WEN</td> <td></td> </tr> <tr> <td>4. LAI YAN XI</td> <td></td> </tr> <tr> <td>5. WONG YUNQING</td> <td></td> </tr> <tr> <td> </td> <td></td> </tr> </table>	Name	Mark	1. CHAN JIAN BIN		2. CHUNG LI YI		3. NG KAI WEN		4. LAI YAN XI		5. WONG YUNQING			
Name	Mark																			
1. CHAN JIAN BIN																				
2. CHUNG LI YI																				
3. NG KAI WEN																				
4. LAI YAN XI																				
5. WONG YUNQING																				

Comments (if any):	Total (30 marks)	
	Name	Mark
	1.CHAN JIAN BIN	
	2. CHUNG LI YI	
	3. NG KAI WEN	
	4. LAI YAN XI	
	5. WONG YUNQING	

Assessment Rubrics – Assignment Part 2 (70 marks)

Criteria	Marks	Excellent	Good	Average	Poor	Score												
CLO 2: Demonstrate the web development using web development tool, Cascading Style Sheets (CSS) and JavaScript.																		
Functionality & Complexity of the Website Module using the following elements: <ul style="list-style-type: none"> • Media elements (text, graphic, audio, video and animation) • Hypertext and hypermedia • List • Formatting • Hotspot / image map • Table • Form • CSS for all of the GUI design (use External Style Sheet effectively) • JavaScript 	40	Excellently completed more than 80% of the required functionalities correctly using all the listed elements. High level of complex algorithms and programming skills. (32 – 40)	Completed more than 60% of the required functionalities correctly using most of the listed elements. Average level of complex algorithms and programming skills. (21 – 31)	Averagely completed more than 40% of the required functionalities with some minor errors. Only used some of the listed elements. Low level of complex algorithms and programming skills. (11 – 20)	Not able to complete most of the required functionalities correctly. Only used few of the listed elements. Poor level of complex algorithms and programming skills. (0 – 10)													
Creativity in Modules' Function & Interface Design	10	Excellent creativity in module function and interface design. (9 – 10)	Good creativity in module function and interface design. (7 – 8)	Average creativity in module function and interface design. (5 – 6)	Poor creativity in module function and interface design. (0 – 4)	<table border="1"> <thead> <tr> <th>Name</th> <th>Mark</th> </tr> </thead> <tbody> <tr> <td>1. CHAN JIAN BIN</td> <td></td></tr> <tr> <td>2. CHUNG LI YI</td> <td></td></tr> <tr> <td>3. 1.1 Description of the Organization

Kicoco Mobile Phone Station is an online phone, laptop, tablet, smart wearables and accessories reseller from trusted sources such as Samsung Malaysia, Apple Malaysia, Asus Malaysia and more. This website is aimed to encourage consumers purchasing electronic devices via online reseller instead of just looking at the same store as our reseller website will have more brands and options to let customers choose. The website will encourage online shopping as customers can just chill and relax at their house and shop with us without worrying about having a lack of parking lot issues while shopping in the mall which is a waste of time and money while looking for a parking lot. They can just sit at home and connect their phone to the Internet and continue to shop with us.

Our Kicoco Mobile Phone Station website is mainly reselling products such as mobile devices, laptop, tablets, smart wearables, and smart device accessories. We resell a variety of brand's products which are from Samsung, Apple, Acer, Oppo, Huawei, and Asus. Those are the most recognizable brands that all of us know and we believe that we are able to attract a lot of customers from all over Malaysia and possibly from other countries to purchase their electronic devices with our website.

The website is designed with a pinkish tone which brings a more modern look to the website. Other than that, there are a lot of buttons and information in the website which allows customers to easily understand the product's description and its price. This is because the user-friendly design of our website has significantly improved the user experience of our website which means users require less time to browse the website and look for the product they are looking for.

Our shop is collaborating with other big distributors and resellers such as SEC, SenQ, SenHeng and more. This can significantly increase not only our shop's sales but also be able to increase their sales too. It is a win-win situation because both of us will benefit from this collaboration.

1.2 Website Objectives

This website is mainly designed for young users and also seniors who are interested in buying electronics devices. This website brings convenience to them as they do not require to walk into physical stores which will be a time consuming process compared to purchasing it online as walking into physical stores is required to look for a parking lot which might already take most of your time before even having the chance to look for your device. By designing these websites, a lot of customers will be able to browse through our website and look for the product they are looking for by just clicking on the photos, buttons or headers. By comparing our websites to other competitors, our websites will be significantly more user friendly. This is because of our design that is simplified and straightforward to the point.

Other than that, this website also helps in improving the economy of our country. This is because in collaboration with some biggest sales agents, distributors or store outlets, all the customers are able to shop with us through our website. By having their advertisement, we believe that the sales will be increased as all of us are trusted resellers that are verified by all companies and customers will give their trust on us and purchase products from us. In this case we are able to extend this online sales to other countries which will improve our country's economy too.

In short, this website is an authorized reseller that resell products from big companies to Malaysia with delivery from various delivery services including our own delivery service which have high response rate and high delivery rate with good reviews.

1.3 Potential users of the website

This website is aimed at those who are willing to buy devices via an online platform rather than go to a physical store. This is because most of us are busy with our own work and tasks which might not have time to walk into physical stores and look for the product that we are interested in. So by having these online stores, individuals that are busy with their work and tasks can use our websites to purchase the products that they are interested in. This is because they can use their rest time or free time to browse through our websites without needing to look for parking, which is what you need to do while visiting the physical stores.

Other than that, our user-friendly and simplified design allows users to find their product in a short amount of time which reduces the time of waste and increases their purchasing time. The information is listed properly in the sites to where users are able to have a read on the product's description and know about it. So, this website is very suitable to those who are looking for short and straight forward designs where they can straight away look for the product they wanted and buy the product in a short amount of time.

Besides, this website also aimed for those who prefer online shopping rather than going to physical stores. After the Movement Control Order (MCO) set by our government, most of the customers prefer online shopping over physical shopping. This is because they had experienced the convenience of online shopping compared to physical shopping. It also urge the importance and also the convenience of online shopping in authorized websites rather than other unauthorized websites with the consideration of protecting users' privacy such as their personal information which might be protected by third party unauthorized websites.

1.4 Information that users need and want

The information that users need to know is mainly the product details. The design will be the product title with its short details. After clicking into the product, the specification and the further details of the product will be shown on the screen. The price will be shown on the screen as well before clicking into the product so that the user can know the overall price of the device before making a decision and purchase.

After clicking into the product, users are able to select the quantity or the color of the device. During the selection screen, users will be able to read through the product descriptions and also the price available for the product. Then, they can proceed with the purchase.

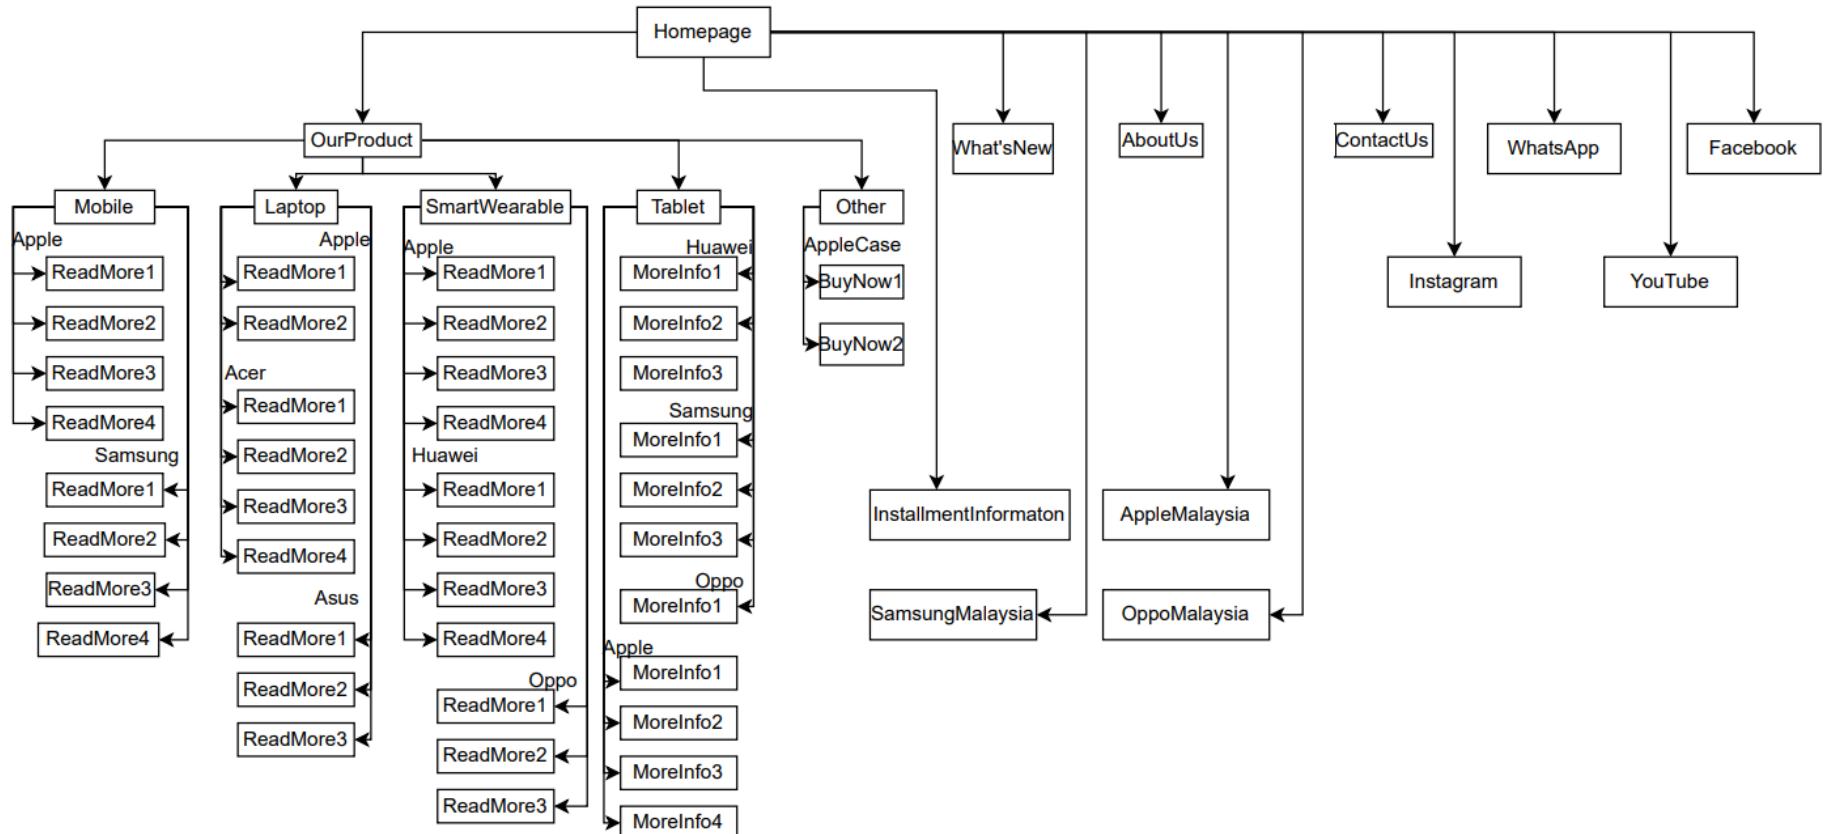

All the information and details of the product will be listed clearly and has been simplified which allows user to get in touch with the product easier. Other than that, some introduction video is also included in the websites which makes user much easier to understand the product in the website.

Flowchart

2.0 Explanation of the Websites

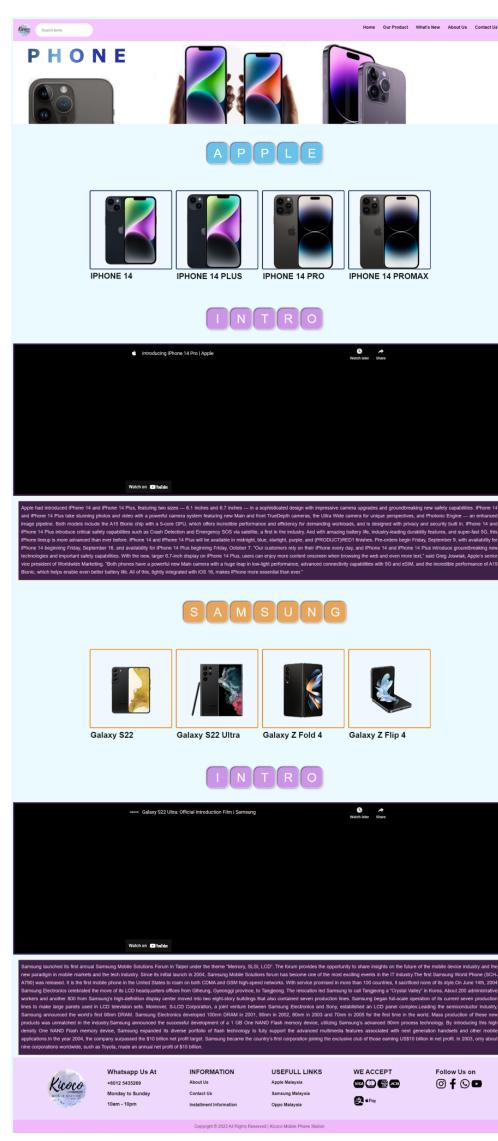

[Home page](#)

index.html

In the home page, the user is able to navigate through different categories of menu. First, users can shop with categories such as phone, tablet, laptop, smart wearables and others. When a user clicks on the selection, it will be brought to the specific page. For example, if the user clicks phones, it will navigate the user to the phone pages with the available devices. Next, in the featured brands section, there are 3 popular brands that are featured by our shop. When users click on the brand, they will be navigated to the specific brand websites in our page. Next, there is a shop review section which shows the review given by our previous customers regarding our shop. There is a section where new customers can leave their comments too.

At the header part, the logo can be clicked and navigate back to this main page. There is a search bar too. At the right of the header, there are selections that link users to different pages. For Our Product option, there is a drop down list which shows the categories of our product that allows users to shop by product categories. For the footer, the follower will be linked to different social media platforms and useful links will be linked to different websites.

apple.html

In this page, users are able to browse through 2 different brands of phone that we sold on our website which are Apple and Samsung. In this site, there are brief descriptions of both products which give users a structured point of view towards the product. There are also videos on the highlight of the product which let users have a more understanding on the specific product they are interested in. When the user hovers its mouse over the phone photo, the photo will be flipped around and showing the brief product details for the specific product. There is a read more option which will be navigating the user to the product's page which contains the full details of the product.

There is an additional design where when users click on the APPLE, SAMSUNG and INTRO words, the logo will be showing a rainbow color which will be an additive to the website and user impression.

iPhone 14

THE BEST iPhone EVER INVENTED

Size and Weight²

- Height: 146.7mm
- Width: 71.5mm
- Depth: 7.80mm
- Weight: 172g

Capacity

- 128GB²
- 256GB²
- 512GB²

iphone14.html

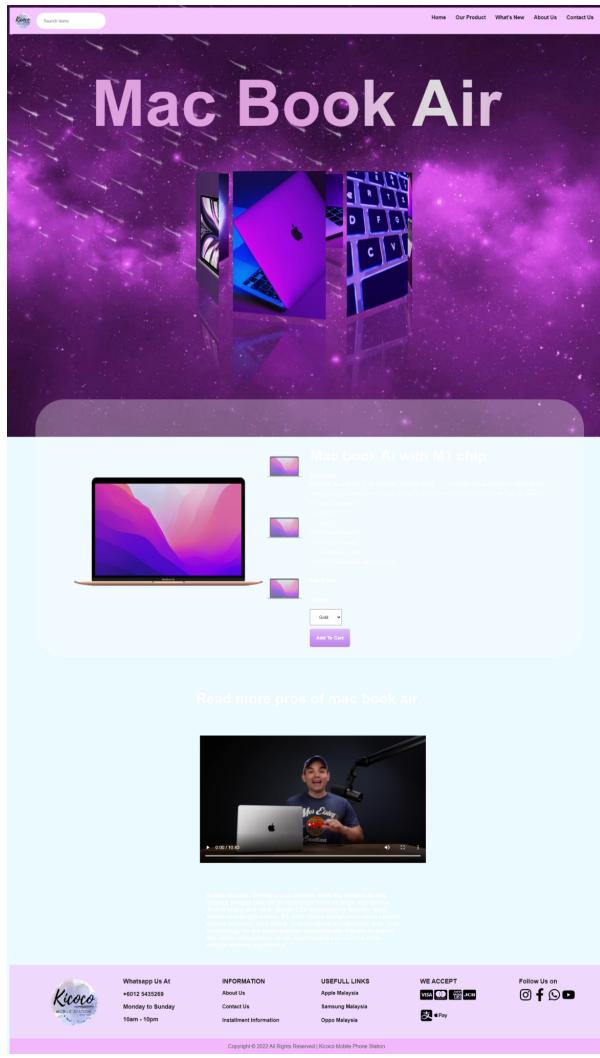

After the user clicks on the learn more button of the product in *apple.html*, the user will be navigated into the product details page. In this page, the detailed specification of the device will be listed neatly in the sites. When users click on the color of the device, users are able to view the product's picture in detail so that they have a clearer view of the product and how it should be expected to look like in real life. There will be a related product section which will suggest related devices to the users so that they can make decisions and also compare the model, price and device specification to each other so that they are able to make a better decision in taking which devices they are interested in.

This design is applied on *iphone14plus.html*, *iphone14pro.html*, *iphone14promax.html*, *samsungs22.html*, *samsungultra.html*, *samsungfold4.html*, and *samsungflip4.html*.

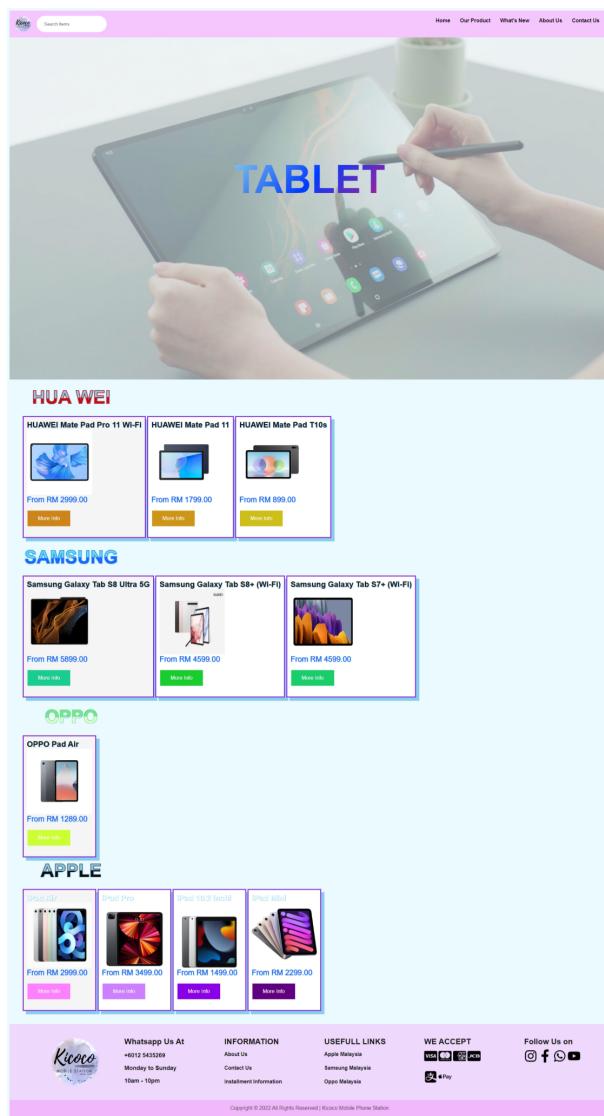

laptop.html

In this laptop section, users are able to view all the available devices sold in our store such as Apple, Acer and Asus. In this page, the product structure description will be listed in each division. The picture of the product is also moving so that it is able to improve the user experience while visiting the website. The top laptop section is also designed to be changing images by itself to increase the beauty of the website. Other than that, the Laptop word of the heading of the websites is also animated with flowing color going on in the word which increases the overall viewing experience and design of the webpage. When the user clicks on the learn more button, the user will be navigated to the product page which contains the detailed information of the device.

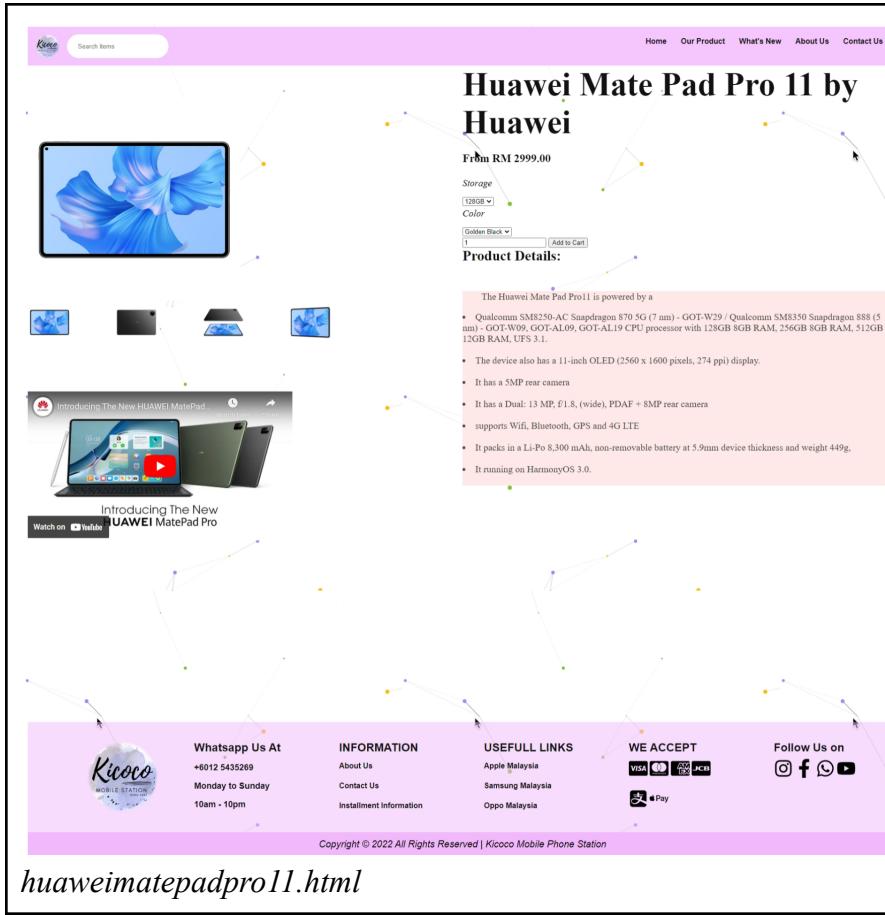

laptopApple1.html

In this page, the overall details of the product will be shown. At the top of the websites, there is an animating panel where the picture will be rotating and showing the pictures of the product. At the center section of the page, users can click on the photo to view the different color of the product so that they can decide which color to get. Other than that, the specification of the device is clearly listed beside the photo too. At the bottom of the website, there is a review video with some brief descriptions which users can watch and get the overall idea of the laptop itself before making its purchase. This design is about the same and applied in *laptopApple2.html*, *laptopAcer1.html*, *laptopAcer2.html*, *laptopAcer3.html*, *laptopAcer4.html*, *laptopAsus1.html*, *laptopAsus2.html* and *laptopAsus3.html*.

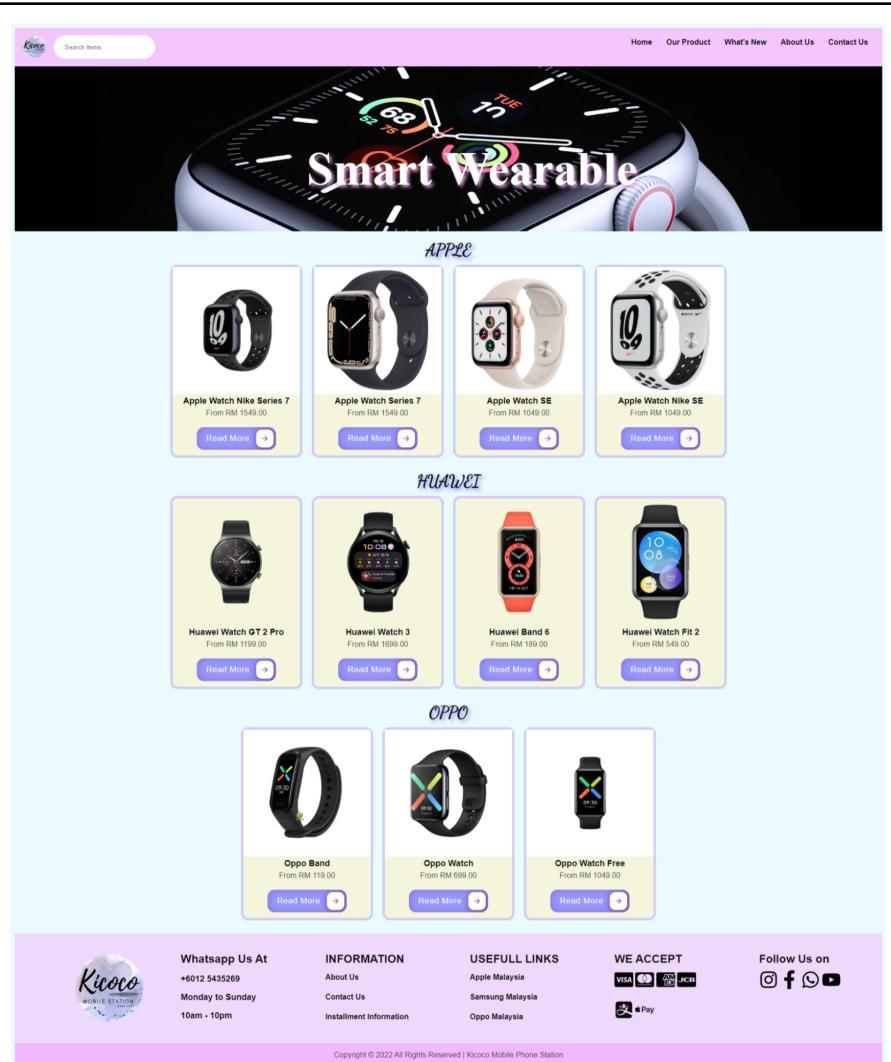

tablet.html

In this page, users are able to shop for tablets that are available in our shop. There are different brands of tablet available which are Huawei, Samsung, Oppo and Apple. The model of the device and its price is listed clearly on the website where users can know which tablet to choose based on their budget. When users hover their mouse over the product's photo, the photo will be expanded which increases the user experience of the website instead of having a boring picture design. When more info buttons are clicked, users will be navigated to the product page with the product details.

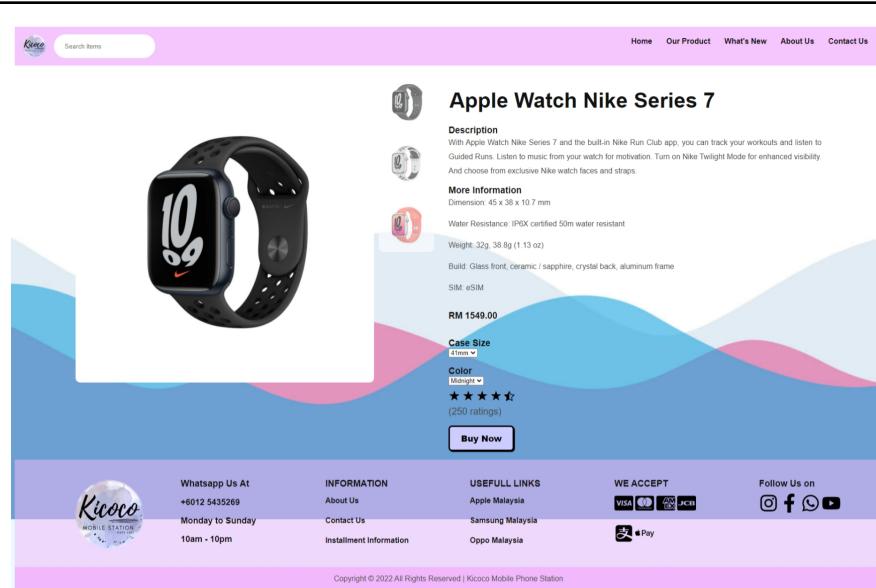

[huawimatepadpro11.html](#)

In this page, users will navigate through the specification of the device after clicking the read more button in *tablet.html*. The details of the product are clearly listed with all its specifications and also its features. Users are able to choose the storage they need for the device and also view the product's picture in different perspectives by clicking the product's photo. Other than that, there is also a video where users can watch to have a brief idea on the tablet itself. The webpage is also designed with an animated background which makes the website become more interesting to be navigated with. This design is used throughout *huawimatepad.html*, *huawimatepad10s.html*, *samsunggalaxytabs85g.html*, *samsunggalaxytabs8+.html*, *samsung.html*, *oppotabair.html*, *ipadair.html*, *ipadpro.html*, *ipad10.2.html*, and *ipadmini.html*.

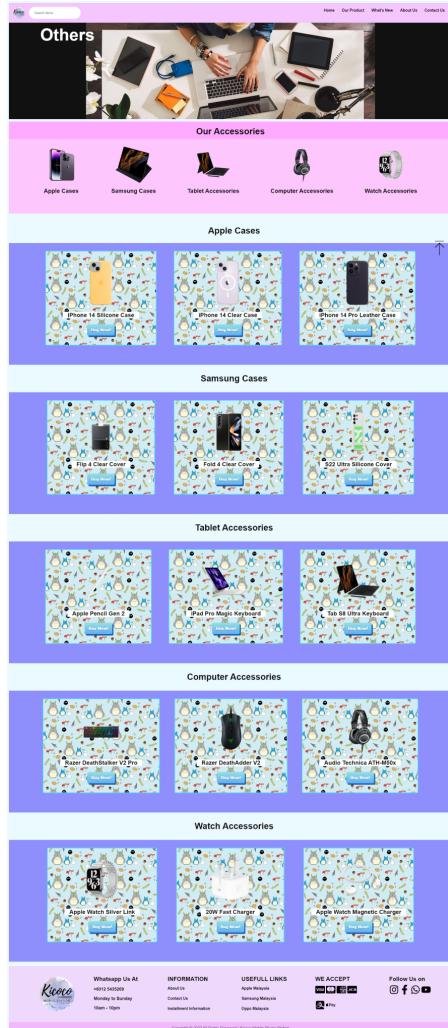

smartwearable.html

In this page, users are able to browse through all the Smart Wearables that are available in our shop which are Apple, Huawei and Oppo. The page is designed to be simple and straightforward which allows users to easily navigate through the smart devices which they are interested in. When the user hover the mouse over the product, the product will be reflected with a small zoom in effect which makes the page look to be more interactive with the user. When the read more button is clicked, user will be navigated to the pages where all the details of the watch listed properly for user to read with.

[applewatchnikes7.html](#)

In this part of the webpage, users will be linked from the *smartwearable.html* after clicking on the read more button. This page will be showing all the details of the product which enables users to have a look and read of its specification. Users are able to click on the images so that they can have a clearer view of the device by knowing how it will look in real life situations. Users can select the watch size and also its color when purchasing the watch. The background was chosen to match the sporty feeling of the watch which gives an overall more nicer look while browsing the web page. This design is used throughout *applewatches7.html*, *applewatches.html*, *applewatchnikes.html*, *applewatchgt2pro.html*, *huaweiwatch3.html*, *huaweiband6.html*, *huaweiwatchfit2.html*, *oppoband.html*, *oppowatch.html*, and *oppowatchfree.html*. There are also a product overview video in some websites too such as in *oppowatchfree.html*.

others.html

In this web page, users are able to purchase the add ons and accessories for their devices which they had purchased just now. This section is mainly for users who are looking for additional accessories without needing to navigate to other pages. At the our Accessories section, when a user clicks on the Apple Cases section, the page will automatically scroll to the Apple Cases section. The picture is also designed to be zoomed in while the mouse is moved to the picture. The section of the product with Totoro background is designed so that it is able to bring a friendly look to the websites. Other than that, there is a back to top button which allows the user to click on it and goes back to the top page of the website. When the buy now button is clicked, it will navigate user to the product details page.

iPhone 14 Silicone Case With MagSafe

Overview
Designed by Apple to complement iPhone 14, the Silicone Case with MagSafe is a delightful way to protect your iPhone. The silky, soft-touch finish of the silicone exterior feels great in your hand. And on the inside, there's a soft microfiber lining for even more protection.

ip14silicone.html

After clicking the buy now button from *others.html*, users will be brought into this product details page. The page will show users the overview product details which allows users to have a rough idea on the product's design and also its features. When the user clicks on the picture of the device, the big picture will be changed as well. This can let users have a closer look onto the device where they can have a rough idea on how the case will look when it is applied on their phone. There is a review section as well so that users are able to read the comments and feedback from other customers who already brought the same product. This design is used among *ip14clear.html*, and *ip14proleather.html*.

aboutus.html

In this about us section, users are able to know more about the team who built up this entire website. At the about us section, the background was designed by combining a lot of photos that we had taken while doing and completing this assignment. Other than that, there is an autoplay audio track which will be auto played while navigating the page. There is a brief instruction about our team at the Our Team section. At the Our Group Members section, there are introductions about our team members. By clicking on their photo, it will be linked to their own social media page. At the last section of the page, the image is linked with image mapping which users are able to click on the person and it will be navigated to the person's social media page.
